A Legacy of Innovation and Success

Q3 Technologies is a driving force for positive change, leveraging cutting-edge technology and developing innovative solutions to create a sustainable and inclusive world. With over two decades of experience, we lead the technology industry, delivering transformative results in enterprise software development, mobile apps, data and analytics, AI, cloud services, and cybersecurity. Our vendor-neutral approach enables us to engineer bespoke, cost-effective solutions aligned with our clients' unique needs. Trusted by renowned brands like Samsung, Michelin, Panasonic, FirstGroup, Adani, Vedanta, Aditya Birla Group, Compass, and several more, we are known for excellence and exceptional customer experiences.

Success Story 1

Driving Customer Engagement with a Versatile Customer Mobile App for one of the Largest Utility Providers in India

Q3 Technologies achieved a remarkable transformation of a mobile app, securing impressive ratings of **4.6** and over **500,000** downloads. The comprehensive solution involved overhauling the app with seamless customer interaction, introducing new features such as bill payments, account management, transaction history, complaint updates, service requests, reward points redemption, and access to the latest offers. The intuitive interface empowered over **3 million** customers to efficiently manage their electricity consumption, providing the client with easy and convenient monitoring capabilities, leading a digital revolution in the utility industry.

Success Story 2

Improving Recovery Rate (RR) and Cutting Loan Default Premiums using AI-Driven Predictive Analytics for a Leading Financial Lender

Q3 Technologies partnered with one of India's top financial service providers, delivering an AI-enabled financial solution with a focus on EMI payment forecasting for active agreements. The tailor-made solution incorporated predictive models to optimize cash flow, reduce loan defaults, and enhance customer satisfaction. The application provides daily updates, enabling proactive measures to avoid defaults. As a result, the client has been able to increase collections and reduce defaults up to **50%** thereby directly impacting the bottom line.
