

Mr. Suunil Dabral

Senior Vice President
& Business Head

Godrej Körber Supply Chain Ltd.

What are company's major product offering?

We at Godrej Körber, are leaders in warehouse automation, offering a complete solution suite. This includes stacker cranes, conveyor systems, and software like Warehouse Management Systems (WMS) to optimize warehouse operations. Our solutions eliminate manual handling with AS/RS and autonomous robots, while ensuring efficient movement within warehouses through conveyors. This comprehensive approach, combining technology and expertise, aims to streamline supply chains across industries in India, boosting efficiency and cost savings for businesses.

How does your organization leverage on innovative supply chain & logistics solutions to drive operational efficiency among Indian enterprises?

We offer comprehensive solutions to elevate Indian businesses' operational efficiency. We combine technology, partnerships, and customized services to tackle complex global supply chain challenges. Our strong foothold & innovative automation, software, and robotics solutions empower over 150 projects in India. The modern supply chain faces a dynamic environment with economic shifts, regional tensions, and environmental

factors hindering smooth operations. We tailor solutions for companies of varying sizes and strategies, helping them navigate complexity and drive innovation. By integrating software, automation, voice, mail, and robotics solutions, we empower clients with business intelligence and agility. This allows them to adapt to changing environments and foster innovation. The rise of automation in manufacturing highlights the need for efficient material handling systems. Our automated solutions streamline operations, ensuring efficient production and warehouse management.

What are company's initiatives to drive sustainability practices for business operations?

At Godrej Körber, we prioritize sustainability, aiming to minimize environmental impact and contribute positively. Our "House of Sustainability" framework reflects this commitment. It incorporates ESG aspects into all their activities. The framework outlines focus areas with subtopics, ensuring a comprehensive approach. We have recently incorporated human rights risk management and sustainable product development. By understanding stakeholder concerns through open communication, we strive for continuous improvement in sustainability. ■

How would you describe the company's joint venture journey in India?

Your reliable partner for End-to-End supply chain solutions

Godrej Körber Supply Chain Limited, a joint venture between Indian giant Godrej & Boyce and German leader Körber AG, provides intralogistics automation solutions. We offer European technology manufactured locally, catering to industries like pharmaceuticals, food & beverages, and automobiles. India's warehousing market is booming, projected to reach ₹ 2,028.86 billion by 2025. E-commerce and government initiatives to strengthen manufacturing are driving this growth. Recognizing this, Godrej Körber leverages its expertise and partnership with Körber AG to introduce cutting-edge warehousing technologies. Presently, we have solidified our presence in the market, showcasing a robust resurgence supported by a compelling "Value Proposition" underpinned by German technology and the "Make In India" initiative championed by our esteemed Prime Minister, Mr. Narendra Modi.
