How is your company supporting digitalization drive of Indian MSMEs and large corporates?

Inspira Enterprise is improving and strengthening the Security Infrastructure of MSMEs and large corporates by,

Streamlining security management

It streamlines security management by eliminating the need to navigate a complex array of point solutions. It provides a unified approach through its partner networks, seamlessly integrating top cybersecurity tools and solutions.

Delivering business outcome-based security services

It delivers business outcome-based security services by leveraging industry-leading expertise across all areas of IT infrastructure and cybersecurity. Inspira incorporates best practices and extensive experience from multiple fields, offering renowned consulting and proven trusted solutions.

Boosting cyber resiliency

Cyber resiliency is boosted by creating greater threat visibility, easier management, and faster

What are some of the innovative initiatives taken by your company in recent years? How have those initiatives helped your organization?

Inspira's recently launched Cyber Fusion Centers (CFCs) in Manila and Dallas are equipped to not only detect, respond, and remediate incidents in near real-time, but also provide intelligence-based analysis which helps prevent future cyber security threats. Innovative solutions are co-created with clients and partners to meet unique requirements.

Inspira is now developing a native MDR platform, iMDR, which is slated for release to clients this year. This platform will feature advanced detection and hunting capabilities, along with a GenAI-enabled dashboard integrated into the iSMART2 customer portal.

Additionally, Inspira is expanding its service portfolio with innovative solutions like deception as a service and IT-OT converged Security Operations Centers (SOCs). ■
