

Anil H. Gupta

Managing Director

Krishna Antioxidants Private Limited

Established in 1991, Krishna Antioxidants Pvt. Ltd. is a leading manufacturer of specialty chemicals in India. We interviewed Anil Gupta about Krishna's success story, sustainability practices, and company's plan towards "Aatmanirbhar Bhavishya".

Our emphasis on innovation and unwavering commitment to engineering innovative chemistries has made us a trusted name in the global chemical market for oil drilling fluid chemicals, oil production chemicals, and refinery chemicals to lubricant additives, petrochemical additives, polymer additives, surfactants, agrochemicals, textile chemicals, inks, paints & coatings, and water treatment chemicals which we market under our exclusive trademark, CRISTOL™, with a 182K MTPA manufacturing capacity, to a diverse client base spanning 32 countries across 6 continents for the last decade and growing.

CRISTOL™
KRISHNA ANTIOXIDANTS PVT. LTD.

We also work as a manufacturing partner to companies leveraging our technical expertise and process capabilities to effectively formulate products. Our state-of-the-art on-site testing facilities and technical expertise allow us to provide valuable insights and guidance in identifying & screening the right chemistries while maintaining strict confidentiality.

Our keen focus on sustainability, commitment to growth & pursuit of excellence reflect in our prestigious certifications: We have received a 93% Gold Rating: ECOVAIDIS TFS approval. We are also GMP, ISO 9001, ISO 14001, ISO 45001 certified by the British Standard Institute for QHSE.

Notable achievements includes CHEMIXCIL awards year on year for outstanding performance in exports from the Indian Chemical Council, further solidifying our reputation as a trustworthy and reliable business partner.

Additionally, we have implemented a robust Environment, Health, and Safety (EHS) policy, ensuring well-being of our employees, communities, and the environment.

How is the company gearing towards "Aatmanirbhar Bhavishya"?

Company focucess on building

a self-sustainable ecosystem and have undertaken several initiatives to strengthen our commitment to "Aatmanirbhar Bhavishya.":

1. We have invested significantly in R&D, focusing on enhancing our in-house capabilities. By fostering innovation & advancements within our organisation, we strive to reduce dependence on imports by backward integration and finding indigenous sources of key raw material. This also lowers our carbon footprint.
2. We have local state-of-the-art manufacturing facilities through which we aim to increase domestic production of specialty chemicals to 300K MTPA by year 2025. By manufacturing our products within the country, we contribute to reducing imports, boosting local employment & driving economic growth.
3. We have been nurturing expertise within our organisation through training programs, skill development initiatives, and knowledge sharing to empower our employees to become industry leaders in their respective fields which in-turn contributes to building a strong talent pool within India.

We are committed to embracing self-sufficiency to contribute to the growth and development of a self-reliant India.
